My current job position is as Web Master/Systems Administrator II for the Washington School Information Processing Cooperative. Responsible for all external and internal websites, web servers as well as Share Point Administrator, Photographer, Audio/Video Coordinator-equipment technician, Graphic Artist, and CGI Animations. I'm certified as a Microsoft Certified Application Developer (MCAD) and Microsoft Certified Database Administrator (SQL Server 2003).

I retired from the United States Army after 20 years November 10, 2000. My last job position was as the Automations Director for the United States Army Field Artillery School, Fort Sill Oklahoma. My position also held additional responsibilities as a Network / Systems Administrator, Web Master and Graphics Designer with the Field Artillery School.

I was responsible for all computer systems, as well as responsible for design, development and all content on 3 major websites that are used for worldwide instructional purposes. One website, <http://sill-www.army.mil/gunnery/>, contains a database of over 3 terabytes of information, and was recognized by the Army as the top site in the Army for 1999 and 2000. I also did all graphics for instructional and presentational purposes and desktop publishing

While serving in the Army I've been responsible for immediate supervision and management of over 150 personnel at a time serving in Desert Storm as a First Sergeant. I also served as a U.S Army recruiter and awarded the Gold Badge with 3 sapphires for achievement, nominated the top Army recruiter in the country in 1993.

I'm currently wishing to stay in the Seattle Washington area. My resume, transcripts and examples of my web development can be downloaded at <http://www.webslingercycles.com/Bio.htm>

I am especially interested in this position and would appreciate an opportunity to talk with you to discuss how my experience will best meet your needs.
